

ZoiPer v5

 **Windows Configuration**

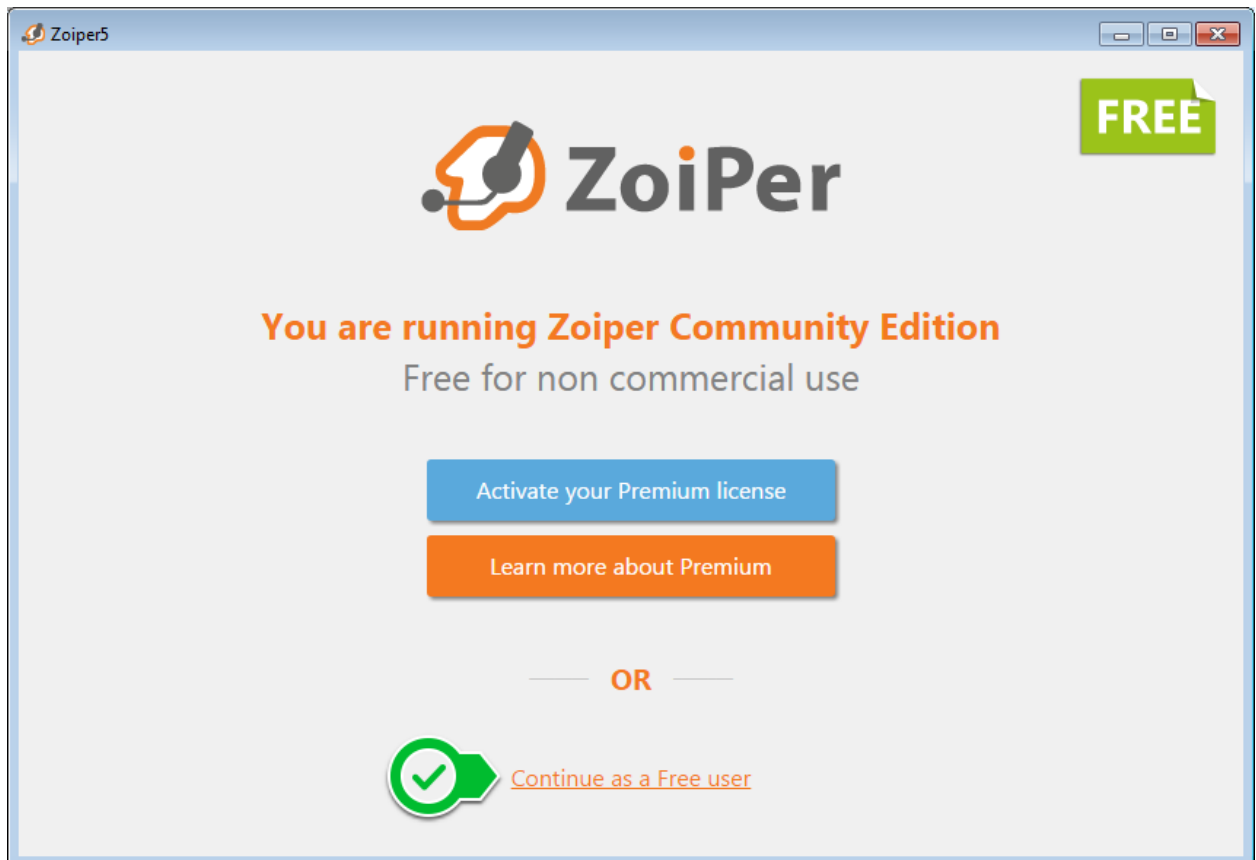

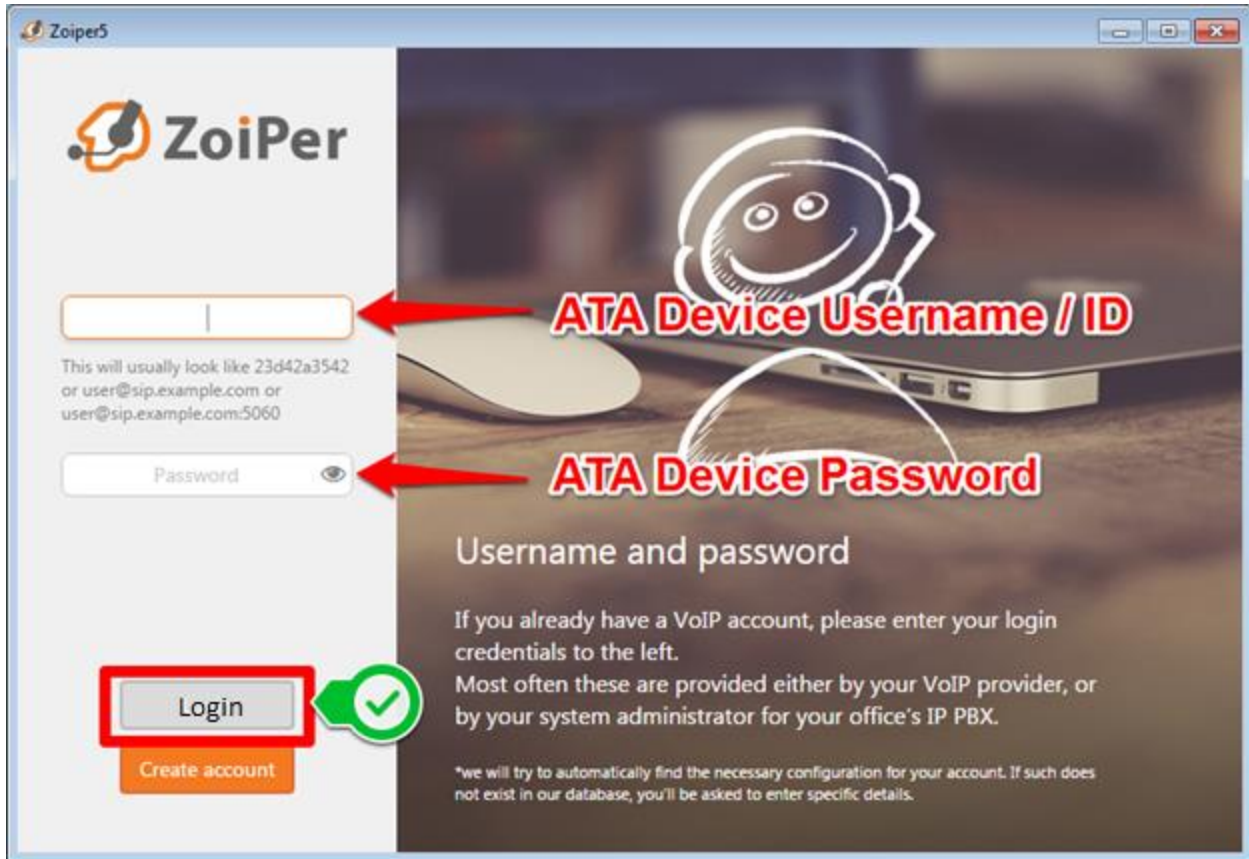

Free Version Download Link:

<https://www.zoiper.com/en/voip-softphone/download/zoiper5/for/windows>

After you have downloaded and installed the **Zoiper v5** softphone client, please follow the steps below:

Launch your Zoiper softphone client and click
[Continue as a Free user](#)

The screenshot shows the Zoiper5 login window. On the left, there is a login form with a text input field, a password field, and a 'Login' button. A red box highlights the 'Login' button, and a green checkmark icon is next to it. Below the 'Login' button is a 'Create account' button. On the right, there is a background image of a laptop with a smiling cartoon headset icon. Red arrows point from the text 'ATA Device Username / ID' to the text input field and from 'ATA Device Password' to the password field. Below these fields, the text 'Username and password' is displayed, followed by instructions: 'If you already have a VoIP account, please enter your login credentials to the left. Most often these are provided either by your VoIP provider, or by your system administrator for your office's IP PBX.' A small disclaimer at the bottom reads: '*we will try to automatically find the necessary configuration for your account. If such does not exist in our database, you'll be asked to enter specific details.'

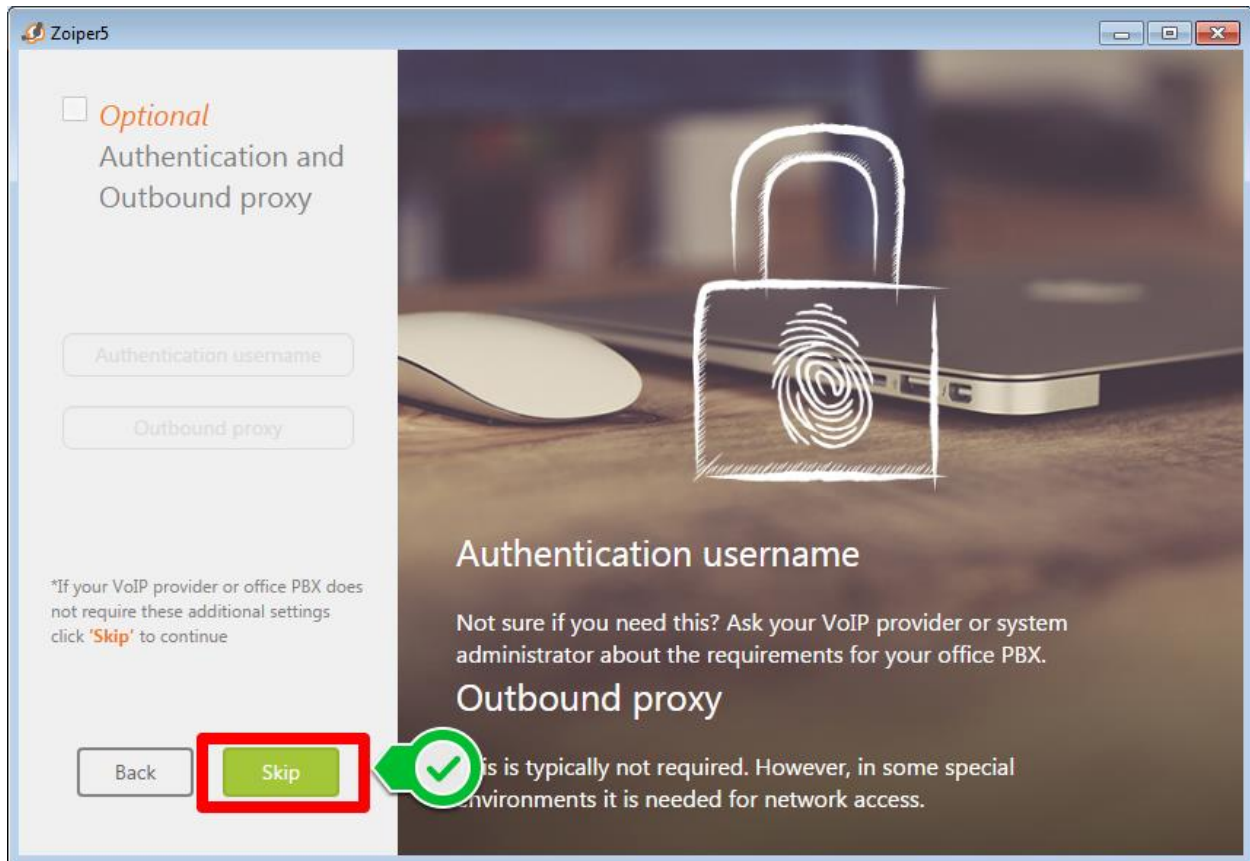

Enter your VoIP Much issued ATA Device Username / ID and ATA Device Password and then select Login.

Your ATA Device Username and Password details are found in your VoIP Much activation email.

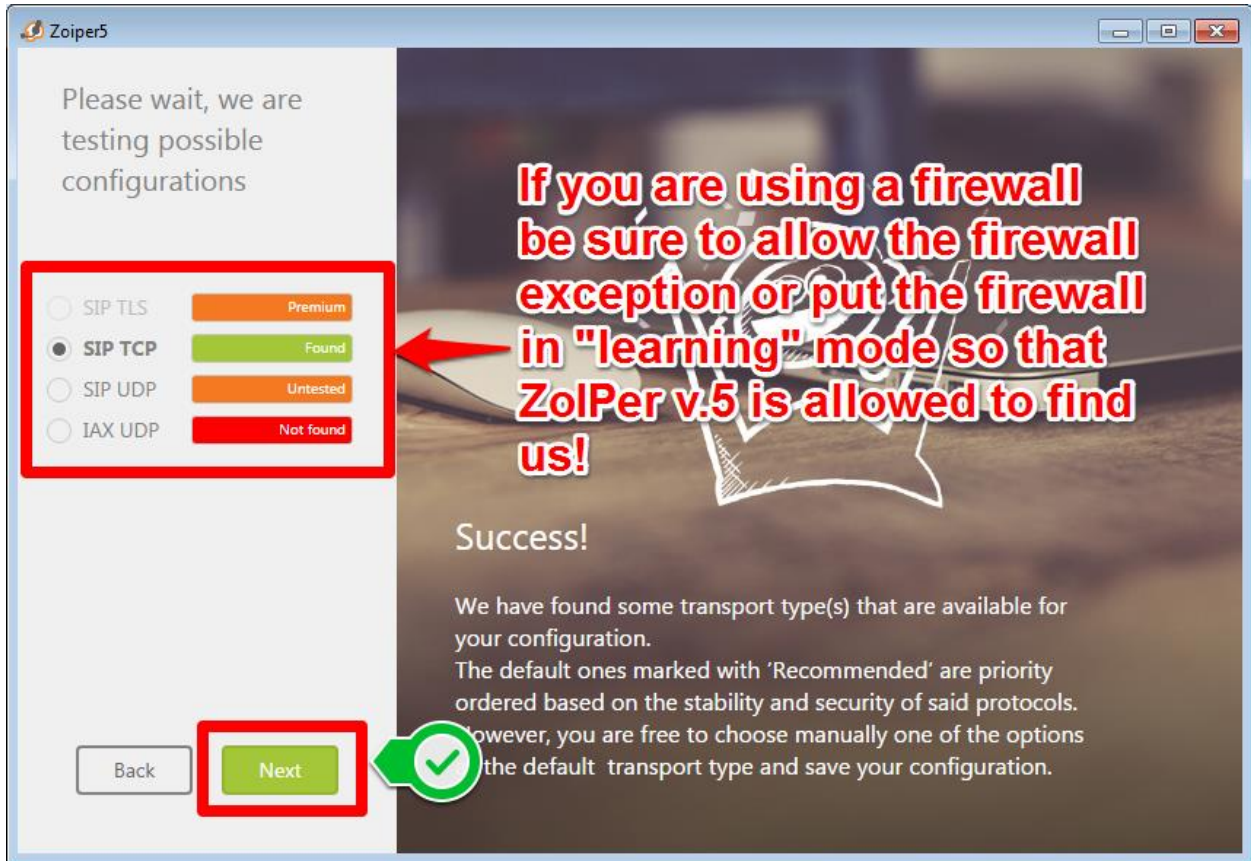

Enter the Domain.

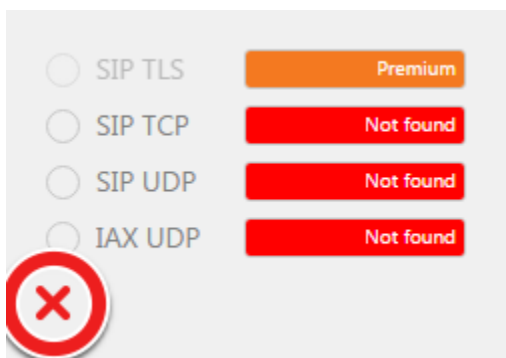

The domain value is the SIP Server address / domain entry found in your VoIP Much activation email.

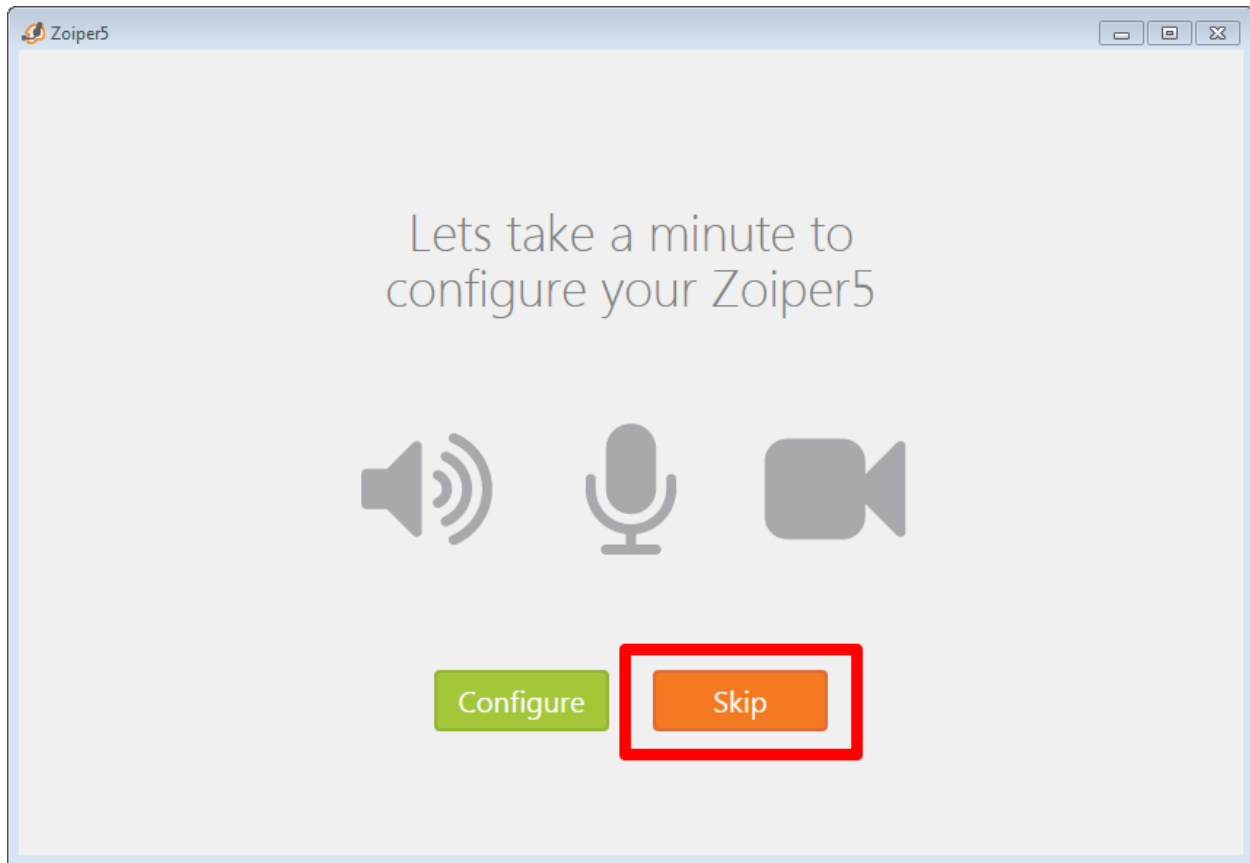

Select Skip on this step as it is not used for **VoIP Much**.

If Not Found appears across all possible configurations, you may need to check your firewall/security settings in Windows Firewall or your Firewall software:

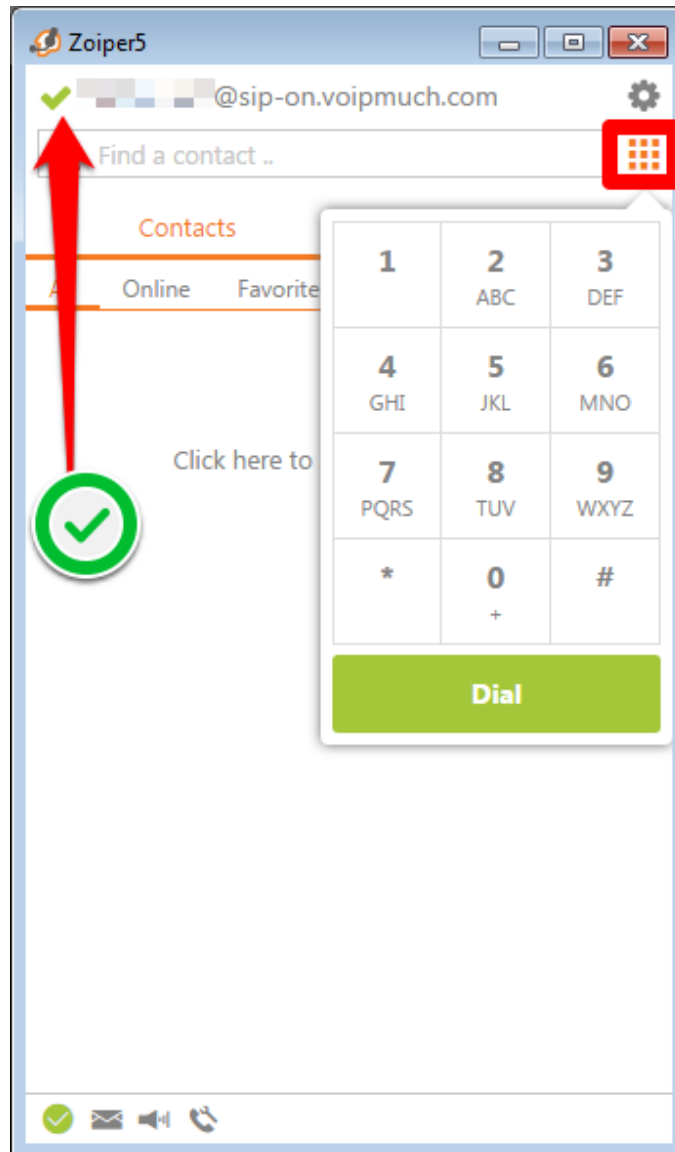

Skip the speaker, microphone, and camera configuration testing. You should now be ready to make and receive calls!

The green check mark up in the top left will indicate your Zoiper v5 is registered with our service.

The Zoiper dial pad is highlighted in the red box. We suggest calling your family and friends at this point to say hello from your VoIP Much phone service!
